

TRANSFORM ANY SPACE INTO A SLEEP HAVEN

STOPLITE® is a blackout roller blind and part of the ROLASOLV product range. The **STOPLITE®** blind comes inside an aluminium cassette, complete with double side channels and light barrier brush strips.

It is designed to significantly reduce sunlight and create optimal daytime sleeping conditions. The absence of chains and cords ensures a clutter-free window area, while the specially designed bottom rail can be stopped instantly in any position, functioning as a sun visor when a completely dark room is not required.

STOPLITE® have been designed to be installed **INSIDE** the window recess. To make it easy to use, a handle is fitted to the bottom rail to lock it at the desired position.

When it comes to crew fatigue management, **STOPLITE®** is an ideal solution for cabin windows in floatels, cruise ships, and other marine accommodation units to improve the sleep quality of crew and guests. Moreover, **STOPLITE®** is **Flame Retardant** and **Type Approved** by DNV for use on all types of marine vessels, ensuring safety and reliability.

Benefits of **STOPLITE®** include:

- Easy to use
- Better sleep quality
- Straightforward to install
- Flame retardant and type approved, ensuring safety and reliability
- Stops at any position
- No cords or chains
- 1-year guarantee
- Free spare parts with every order

TRANSFORM ANY SPACE INTO A SLEEP HAVEN

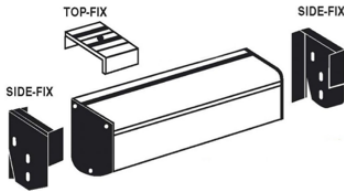

FABRICS

The standard **STOPLITE®** roller blind is available in a selection of high quality fabrics with BS5438 flame spread certification, they also comply with the mandatory IMO FTPC Part 7 A.563(14) resolution.

The standard range includes:

- Blackout Fabric
- Constructed of 67% PVC, 24% Fibre Glass, 8% Adhesive (to France-M1 Fire Classification).
- Easily cleaned with soap and water.
- Available in 6 standard colours: Navy Blue, Cream, Ecru, White, Grey and Black.
- Other colours available on request.
- Other fabric types are available by special request

FIXINGS

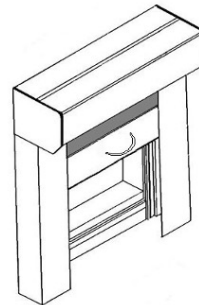

TYPE OF OPERATION

The blind can only be operated effectively by using the handle fitted to the bottom rail.

To **UNLOCK** the blind gently twist and push the bottom rail away from you whilst holding the handle to release the spring locking mechanism. Once unlocked; keep the handle in the same position and raise or lower the bottom rail until the desired blind position is reached. Do not let go of the handle until the blind is in the required position.

To **LOCK** the bottom rail into position gently twist and pull the handle towards you which will make the bottom rail pull up against the front side channels. The spring will automatically lock into position and the blind will not move.

Maximum Width	Maximum Drop	Minimum Width	Minimum Drop
2000 mm	1650 mm	450 mm	250 mm
